

Дистрибуција на задачи за тренирање на модели

Функционалности

- Прикачување на податоци
 - Извршување на код врз податоците
 - Прибирање на резултати од извршувањето
 - Презентирање на резултатите
-
- Основни информации за множеството

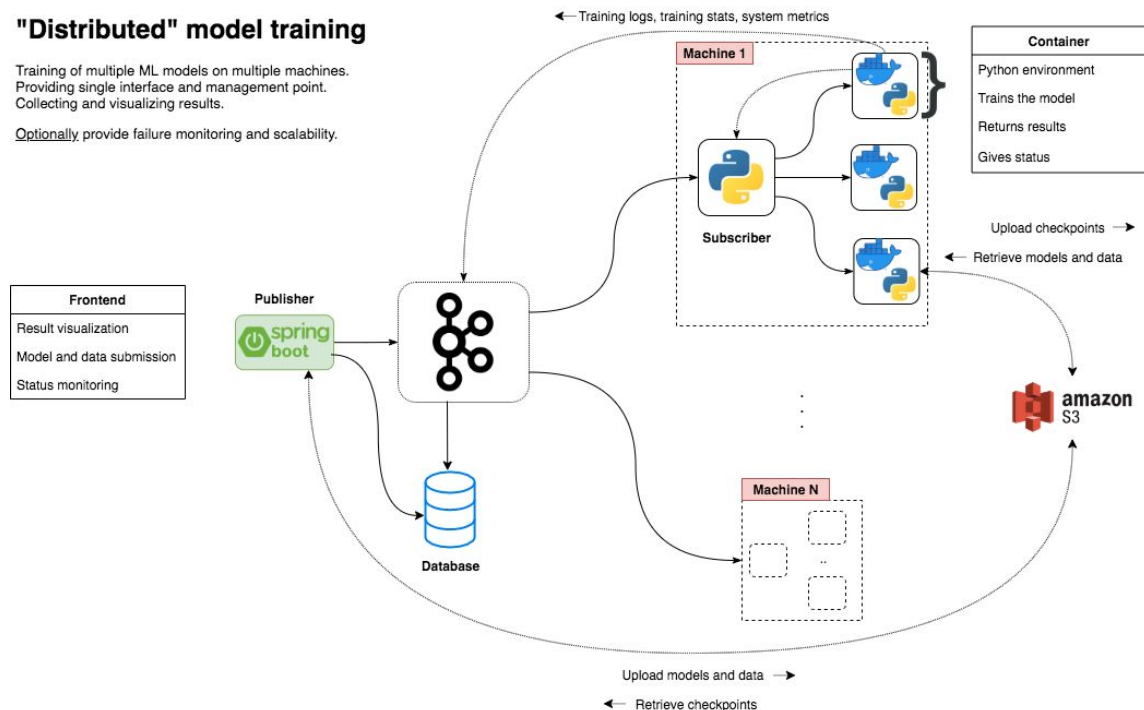

Архитектура на системот

"Distributed" model training

Training of multiple ML models on multiple machines.
Providing single interface and management point.
Collecting and visualizing results.

Optionally provide failure monitoring and scalability.
